About Me

I'm looking for a full stack developer internship where I can use what I've learned about web development to help with cool projects. I know React.js pretty well and love making websites that are easy to use. I want to learn more, work with a great team, and help make awesome stuff. I'm excited to improve and be part of a friendly and creative workplace!

Project

Food-cart

I developed the food cart using React js, css and Fakejson with the help of Rect-Router-dom and some Hooks in react.

Weathe-finder

Designed using Reactjs, bootstrap and open weather Api.
